PROJECTS

- 1. MOTOFIX: Moto Parts & Repair Appointment System (Capstone Project)**
 - Developed a web-based system that allows customers to purchase motorcycle parts and schedule repair appointments online.
 - Built using Laravel, PHP, MySQL, HTML/CSS, Bootstrap and JavaScript.
- 2. IoT-Based Pulse & Heartbeat Monitoring System (IoT Project)**
 - Designed and developed an IoT-based monitoring system for tracking pulse and heartbeat data in real time.
 - Used Arduino Uno and IoT technologies to display and monitor patient readings.
- 3. Tienda Local Marketplace: A website-based marketplace (Personal Project)**
 - Developed a web-based local marketplace that allows local sellers to post products and buyers to browse, and purchase products online.
 - Built using HTML/CSS, JavaScript, PHP, and MySQL.
- 4. TrackEd: A Student Learning Tracking System (Personal Project)**
 - Developed a web-based student learning tracking system that helps users organize subjects, monitor academic progress, and build effective study habits.
 - Built using HTML/CSS, JavaScript, PHP, and MySQL.
